- The instrument will turn green when people are more than 5 ft

Overview

2M Technology's social distance alert system reminder is a perfect way emphasize to customers and employees to maintain the recommended distance to help prevent cross infection of diseases such as COVID-19. Since people can spread the virus before they know they are sick, it is important to maintain the recommended distance apart which doesn't come naturally. Social distancing is especially important for people who are at higher risk for severe illness.

This simple device scans the room to detect if anyone is within the social distance parameter. A red alert warns employees and customers when they are too close. The distance tolerance can be changed.
