

Notes:

- 1 When the pavement position is not smooth, the C30 concrete layer needs to excavate the foundation groove, repour the concrete, and smooth.
- 2 Before each module is fixed, it is necessary to check whether the connection between modules is standard.
- 3 The size of concrete foundation shown is the minimum size.
- 4 The minimum size of PE pipe grooves is 50mm in width and 150mm in depth.
